Comments on Historical and Projected Information:
 Typically only the companies domiciled in Missouri take this credit as it often results in an increase in retaliatory tax of that amount for foreign (non-Missouri based) insurers. Due to this only about 55% of examination costs are taken each year in tax credits. Consequently, the department believes most carry-over each year will eventually expire.

BENEFIT: COST ANALYSIS (includes only state revenue impacts)

	FY 2020 ACTIVITY	Other Fiscal Period (indicated time period)	Derivation of Benefits: The state has not conducted an economic analysis of Insurance Tax Credits, but in the state's 2010 (updated in 2012) Missouri Tax Credit Review Commission Report, this tax credit was considered a feature of Missouri's overall tax structure, rather than a true "tax credit" as that term is used to describe the state's various programs designed to provide an economic incentive or achieve a social outcome. In the report the credit's purpose was described as an attempt to equalize the burden on insurance companies, which, unlike other businesses when calculating income tax liability, cannot deduct certain fees and taxes as operating expenses when calculating their premium tax liability. The report stated that elimination or reduction of this credit would increase taxes on insurance companies above the taxes imposed on otherwise similarly situated industries.

Other Benefits:

Under Chapter 148.400, RSMo., insurance companies are permitted a tax credit for the costs of insurance examinations conducted by the department. Examination costs are business expenses that are similar to corporate expenses deducted when calculating income tax. Due to their tax structure, insurers account for operating expenses through a premium tax credit rather than an income tax deduction.

Other Benefits:
The business of insurance is primarily regulated by the states. Consequently, no federal mechanism exists to guaranty the payment of claims under insurance policies in the event an insurance company becomes insolvent. Instead, the states have taken on this role. Every state in the U.S. has enacted laws creating a life and health insurance guaranty association. In the event that a licensed insurance company becomes insolvent and cannot pay its claims, the various state guaranty associations step in and provide coverage for policy or claim up to prescribed limits. In Missouri, life and health policies are guaranteed between \$100,000 and \$500,000 depending on the type of coverage.

To get the money to pay claims for an insolvent company, the various guaranty associations are authorized by law to levy assessments against all of the other life and health insurance companies in the state. The insurance companies in Missouri are then allowed a tax credit against their premium tax liability for the amount of the assessment.

Historical Background:

In 2008, Lincoln Memorial, along with affiliates Memorial Service Life Insurance Company and National Prearranged Services (“NPS”) was placed in liquidation by the state of Texas. NPS was a Missouri domestic corporation and was formerly one of the largest sellers of preneed funeral contracts in the state of Missouri and nationally. Generally, under a preneed contract, the funeral director or preneed seller agrees to provide funeral services at a fixed or guaranteed price when the contract beneficiary passes away. Ideally, this may result in some savings to the purchaser who may be able to “lock-in” current prices even though the death may not occur for some significant time. Once the services are provided, the funeral director/provider is then reimbursed by the preneed seller for the funeral expenses. Historically, this reimbursement has included all or a portion of the interest that may have been earned on the contract. Under Missouri law, NPS was required to place 80% of all funds paid by consumers into a trust account with a financial institution. Frequently, these funds are used to purchase insurance coverage to guaranty payment of the funeral costs. According to information gathered by state regulators, NPS’ trust funds were depleted because of improper policy loans, insurance investments and potentially the misappropriation of funds by company representatives/shareholders. To the extent insurance coverage on a particular NPS contract was in place, the various state insurance guaranty funds have agreed to cover the contract’s obligations and the potential financial hardship to NPS contract holders will be minimized.

The Affordable Housing Assistance Program (AHAP) increases the availability of rental housing and for sale housing that is affordable to low-income families. Other benefits include the removal of blight in communities and increased local tax revenues such as property taxes. The AHAP credit increases the capacity of non-profit housing organizations to build or renovate affordable housing for low-income families. The AHAP credit increases the amount of disposable income for low-income families by providing housing that is affordable to them. This improves the overall quality of their lives by providing additional income for other basic necessities such as food, clothing, healthcare and education. Lastly, the operating AHAP credit helps organizations attract donations to support operating funds, without which the agencies may not be able to administer their affordable housing programs.

In FY-2020, every dollar of auth. program tax credits returns :

\$1.84 in new personal income totaling \$3.02 million
 \$2.89 in new value-added/GSP totaling \$4.76 million
 \$5.04 in new economic output totaling \$8.29 million

Over 12 YEARS, every dollar of auth. program tax credits returns:

\$0.47 in new personal income totaling \$4.90 million
 \$0.58 in new value-added/GSP totaling \$6.07 million
 \$1.00 in new economic output totaling \$10.48 million

Comments on Performance Measure:

The number of housing units produced is based on what is reported to MHDC by the non-profit sponsor of the development. Projects awarded AHAP credits may be awarded additional credits in succeeding years; however, these projects receiving AHAP credits are not counted as "new units". In this circumstance, MHDC places a new LURA on the units, extending the affordability period. **In FY2020, MHDC extended the affordability for 126 units and 215 beds.**

Statutory Authority: Sections 100.700-100.850, RSMo	Applicable Taxes: Income Tax, Bank Tax, Insurance Premium Tax, Other Financial Institution Tax	
Date of Origin: 1996		

Program Description and Eligibility Requirements:
 The incentives offered by the BUILD Missouri Program are designed to offset infrastructure and other capital costs of certain large projects by making the cost of investing in Missouri more competitive. The costs are financed through the issuance by the Board of certificates (bonds or notes) the principal and interest on which will be repaid by the business. Businesses are then reimbursed for these repayments through the issuance by the Board of Missouri State income tax credits. The businesses may use these credits against taxes, which would otherwise be due, or to obtain a refund if the business has no Missouri income tax liability. All businesses that manufacture, process (including agricultural processing) or assemble products are eligible. Businesses that conduct research and development or provide services in interstate commerce are also eligible. Certain office industries are also eligible. A manufacturing business must invest a minimum of \$15 million and 100 new jobs. An office business must invest a minimum of \$10 million and 500 jobs. There are other factors.

Program Name: Missouri Low Income Housing Tax Credit Program

Program Category: Housing			Type: Tax Credit <input checked="" type="checkbox"/> Other (specify) _____										
Statutory Authority: Sections 135.350-135.363, RSMo			Applicable Taxes: Income Tax, Corporate Franchise Tax, Insurance Company Annual Tax on Gross Premium Receipts, Other Financial Institutions Tax, Express Company Annual Tax on Gross Premium Receipts										
Date of Origin: 1990													
Program Description and Eligibility Requirements: The Missouri Low Income Housing Tax Credit (MOLIHTC) is a ten-year state tax credit available to qualified owners of affordable rental housing. The MOLIHTC generates equity investments from the private sector for the development of new or rehabilitated rental housing which enables owners to lower rents to affordable levels for low-income families. A qualified development is one that (i) rents at least 20% of its units to families earning 50% of the area median family income, (ii) rents at least 40% of its units to families earning 60% of area median family income, each adjusted for family size, or (iii) rents at least 40% of its units to families whose income does not exceed the income limitation designated for the respective unit, where the average of the income-designated units may not exceed 60% AMGI. The development must (a) meet a demonstrated need for affordable rental housing in the community, (b) be economically feasible, (c) leverage tax credits with other financing, and (d) provide affordable rental housing for qualified low-income Missourians for an extended period of time.

HISTORICAL AND PROJECTED INFORMATION

Comments on Historical and Projected Information: 1) Historically, the amount of authorized and issued MOLIHTC has fluctuated based on the number and size of developments receiving an allocation of tax-exempt bond financing from DED and, therefore, receiving 4% MOLIHTCs. Authorized projections assume a 9% MOLIHTC up to 70% of the federal LIHTC allocation and a cap of \$3M Authorized annually for the 4% MOLIHTC. Issued projections include current MOLIHTCs that have been Authorized but have not yet completed construction; the majority of credits are issued in years 2 and 3 after Authorization. Redemption projections are based on a 3-year average and cannot precisely account for carry forward and carry back provisions nor the individual credit holder's decision on when to claim a particular credit.

Other Benefits:
The MOLIHTC program delivers rental housing that is affordable to low-income families, veterans, special needs tenants, and seniors. It reduces blight and improves communities through new construction and rehabilitation of affordable rental housing in Missouri. The reduced rents brought about by the MOLIHTC program increases households' disposable income and allows low-income families, veterans, special needs tenants, and seniors to meet more of their other basic necessities such as food, clothing, education and health care. The subsidy provided by the MOLIHTC program makes it economically feasible to develop new or rehabilitated affordable rental housing in many very low-income rural communities in Missouri. Finally, the equity raised from the MOLIHTC helps preserve affordable rental housing that is in danger of being lost from existing stock.

MHDC did not Authorize any MOLIHTC in FY 2020.

PERFORMANCE MEASURE(S)

Permanent New Jobs Created

Comments on Performance Measure:

This performance measure reflects the total number of LIHTC housing units placed in service, or credits issued each year. Total number of units placed in service, or credits issued, each year varies - dependant on the applications received for consideration, the actual number of projects approved, and the type of projects approved (preservation or new construction). Authorized developments typically take 24 months to complete construction and submit cost certification documentation to MHDC; after which they are issued LIHTCs. No LIHTCs are issued by MHDC or eligible to be redeemed by a development owner until a development is completed to MHDC requirements and ready for leasing.

Comments on Performance Measure: FY2014 was the first year of the program. The estimated number of jobs is the total projected for all projects for which DED issued benefits during FY18, FY19, and FY20. The actual number is the actual number of jobs reported by those projects issued benefits during FY18, FY19 and FY20. Companies have 2 years after authorization to create the statutory threshold number of jobs and ramp up over time. Many of the jobs estimated will be reported as actual in later years. The actual jobs numbers are totals for the projects to date. They are not net new for the year. These numbers do not include retained projects in the Retention category of the program.

Program Description and Eligibility Requirements:

The program provides assistance to eligible companies to train workers in newly created jobs. This program is suited for large attraction and expansion projects creating a substantial number of new jobs. Funds are generated by deferring a portion of the state employer withholding tax - approximately 2% - on the newly created jobs. Eligible companies include manufacturing, research and development, and companies engaged in interstate commerce. This program is administered locally through the community colleges.

Explanation of How Award is Computed:

Entitlement	<input type="checkbox"/> No	Discretionary	<input type="checkbox"/> Yes
--------------------	-----------------------------	----------------------	------------------------------

A formula using the number of jobs to be created and the average annual salary of the workers in the new jobs calculates the amount that can be generated over a period of several years through the diversion of a portion of the employer withholding tax (approximately 2%). Discretionary measures such as review of types of industry and wage rates paid are considered before approving a project.

Program Cap: Cumulative \$55 million (remainder of cumulative cap) \$23,112,563 Annual \$ 8,895,956 None

Explanation of cap:

There is a statewide cap of \$55 million on the amount of outstanding debt (total outstanding project amounts) there can be at any given time. There is a statewide annual cap of \$16 million on outstanding debt there can be at any given time in the fiscal year. This figure changes monthly as debt is retired on existing projects and new projects are issued.

Derivation of Benefits: Individuals claiming this tax credit are providing care for elderly persons who are not receiving state funded services. Without this private caregiver support, these elderly persons may need services such as personal care, homemaker, and respite care funded in part through Medicaid, Social Service Block Grant, or General Revenue. The indirect fiscal benefits are calculated based on the estimated number of elderly persons claiming the credit who are potentially Medicaid eligible, multiplied by the average cost of care for elderly persons receiving care through DHSS (54 total claimants x 21.49 [percent of persons over age 60 in Missouri] X \$4,120 [FY 2020 GR average cost of care] = \$47,811).

Direct Costs Footnote: Direct costs include the dollar value of tax credits redeemed (\$21,506) as well as the General Revenue cost for personnel (\$4,452) who respond to inquiries and register/confirm individuals within the program. (\$21,506+\$4,452 = \$25,958).

Program Name: Rolling Stock Tax Credit						
Department: State Tax Commission		Contact Name & No.: Stacey Jacobs 573-751-1716				Date: October 2020
Program Category: N/A			Type: Tax Credit <input checked="" type="checkbox"/> Other (specify) _____			
Statutory Authority: Section 137.018.4			Applicable Taxes: May be used to offset the current year's advalorem tax liability on rolling stock of centrally assessed private car company.			
Date of Origin: 2008/Beginning January 1, 2009						
Program Description and Eligibility Requirements:						
For tax year beginning January 1, 2009, a freight line company shall, subject to appropriation, be allowed a credit against the tax levied for the applicable year. The tax credit amount shall be equal to the amount of eligible expenses incurred during the calendar year immediately preceding the tax year for which the credit under this section is claimed. The amount of the tax credit issued shall not exceed the freight line company's liability for the tax levied under this section for the tax year for which the credit is claimed.						
Explanation of How Award is Computed:		Entitlement	<input type="checkbox"/> Yes	Discretionary	<input type="checkbox"/> No	
Private car ad valorem tax is assessed to the freight line companies by the following formula: The State Tax Commission determines the assessed value for freight line companies. The Tax Commission determines an average tax rate based on the actual taxes collected from the previous tax year paid by the operating railroads in Missouri. The tax rate is applied by the Tax Commission's calculated assessed value. This produces the "tax levied." This is returned to the Department of Revenue for central collection by October 1st and is due and payable by December 31st. For all taxable years beginning on or after January 1, 2009, a freight line company shall, subject to appropriation, be allowed a credit against the tax levied. The tax credit amount is equal to the amount of eligible expenses (eligible expenses are those incurred in this state to manufacture, maintain, or improve a freight line company's rolling stock) and are incurred during the calendar year immediately preceding the tax year for which the credit is claimed. The amount of the tax credit issued shall not exceed the freight line company's liability for the tax levied for which the credit is claimed. If the appropriation is not totally funded, each company would receive a pro-rata share (based on their claim to total claims).						
Program Cap: Cumulative \$ _____ (remainder of cumulative cap) \$ _____ Annual \$ <input checked="" type="checkbox"/> None _____						
Explanation of cap: The amount of the tax credit issued shall not exceed the freight line company's liability for the tax levied under Section 137.018 for the tax year for which the credit is claimed. Derivation of Benefits: Benefits are based on grant dollars actually paid. Payments are broken into NAICS Codes. Total value-added (direct and indirect fiscal benefits) to the state of Missouri are estimated by IMPLAN. Value-Added Grants are awarded for pre-business start-up costs such as feasibility studies, marketing studies, business planning, etc. and 'Farm to Table' Value-Added Grants.

Other Benefits:

PERFORMANCE MEASURE(S)

Total Missouri Value-Added & Farm to Table Grants Awarded

Comments on Performance Measure: If a funded study demonstrates the potential for a project, then the cost of the study becomes one small part of the actual cost of the project. If the project is successful, it generates a good benefit cost ratio. If the study finds that the project is not feasible, the benefits of the project are the savings of investments that would have been lost. In which case the benefit cost ratio is very high. However, this analysis includes only actual grant dollars and does not take into account whether or not a project is feasible. If a project becomes operational and receives New Generation Cooperative Incentive Tax Credits then those benefits are accounted for in the New Generation Cooperative Incentive Tax Credit Program's tax credit analysis.
